All interested sellers shall review the attached pages of this solicitation and provide their offer in accordance with the specification provided in this document.

The evaluation of offers will be based on the Lowest-Priced, Technically Acceptable (LPTA) approach. It is the offeror's responsibility to prove that the vehicles it is offering meets the requested specifications.

#### **Synopsis:**

#### **Contract Type:**

The Government intends to award a single, firm fixed-price contract to the responsible offeror whose offer is evaluated as the lowest-priced and technically acceptable. The total price shall include all labor, equipment, delivery charges, materials, overhead, profit, insurance, warranty, customs clearance, and all other expenses necessary to deliver the required vehicles. No additional sums will be payable on account of any escalations in the cost of materials, equipment, or labor, or because of the Contractor's failure to properly estimate or accurately

predict the cost or difficulty of achieving the results required by this contract. Nor will the contract price be adjusted on account of fluctuations in currency exchange rates.

**Term of Contract:**

This ensuing contract shall be effective from the date of the Contracting Officer's signature and shall remain valid until all items are received and accepted by the Government.

**Compliance with Specifications:**

Offerors shall also provide with their offer, at a minimum, existing product literature substantiating the acceptability of their offered vehicles in accordance with this solicitation's specifications provided in the solicitation. **Descriptive Literature Required:**

*Definition:* (a) "Descriptive literature" means information (e.g., cuts, illustrations, drawings and original manufacturers' brochures) that is submitted as part of an offer. Descriptive literature is required to establish, for the purpose of evaluation and award, details of the product offered that are specified elsewhere in the solicitation and pertain to significant elements such as (1) design; (2) materials; (3) components; (4) performance characteristics; and (5) methods of manufacture, assembly, construction, or operation. The term includes only information required to determine the *technical acceptability* of the offered product. It does not include other information such as that used in determining the responsibility of a prospective contractor or for operating or maintaining equipment. (b) Descriptive literature must be (1) identified to show the item(s) of the offer to which it applies and (2) received by the time specified in this solicitation for receipt of offers. (c) Data displaying more than one model or size shall be clearly marked so as to indicate the specific item being offered.
